About This Game

Invisigun Heroes is a multiplayer strategy game where you can play as a variety of heroes. The game features a grid-based movement system that allows you to see your own path but not the paths of other players. This system is designed to encourage stealth and tactical play. Environmental cues, such as footprints and sound effects, provide information about the locations of other players. The game also includes special abilities and powerup drops that reward players for their actions. The combination of these elements creates a challenging and rewarding experience for players. A variety of lovingly-made environments, maps, game modes, and abilities combine for high replayability and a deep path to mastery.

Multi-player

Compete with up to **4 players** or bots on a single screen

Controller Support

Control your hero using **gamepads** or the keyboard
